## HIGH PRAISE FOR UTAH GUARDSMEN

General Wedgwood Says Signal Corps Is Second to None in the Country.

Dale Creek, Wyo., Aug. 13.—The maneuvering of the Utah National guard for the present year came to an end Friday when camp was struck. The boys arose shortly after 3 o'clock and the camp was broken up. The boys were loaded by 8 o'clock. The batteries and signal corps made the return hike to Dale Creek by noon. The infantry companies followed in three hours. The only incident on the hike was the turning over of one section of the battery wagons on a bad place in the road.

The trains were loaded and the evening meal served the men in the four sleepers. Both the horse special infantry train, left by dark. A five-hour stop will be made in Grana River, where the horses will be exercised.

General Wedgwood told the officers that the guard made a much greater jump than he expected, and that the reports to the war department would certainly recommend the boys' work. The general added that the Utah signal corps and battery was second to none in the United States, according to statement by regular officers. The Utah rifle team left the guard at Dale Creek for Camp Perry, O. The boys are expected to do things during the national match the last of the month.

## WASHINGTON FIRES.

Bellingham, Wash., Aug. 13.—Forest fires raging four miles north of here have compelled several families to hurry with their household effects into this city. A large force of one hundred men is fighting the flames and so far have protected the mills and farmhouses. Much standing timber and many thousands cords of whiggle bolts have been destroyed.

## NOTICED BALD SPOT COMING ON HEAD

Interesting Story of Consultation with Dermatologist and Successful Use of Cuticura. Also Case of Severe Ivy Poisoning, Relief of Which by Cuticura was Permanent.

"Nine years ago I noticed a bald spot coming on my head and, as I was only nineteen years old, it did not seem natural, as it was on the side of my head instead of on top. My mother advised my seeing a dermatologist and I did so, one of the best in Boston, and he said it was due to a germ I must have got at the barber's. He couldn't assure a cure, but by treating each hair separately by electricity, he said, the hair might come out white or gray, but it would not fall out. He proposed giving me a treatment every month for six months at ten dollars a treatment. When I told my mother she advised using Cuticura and this I did, using Cuticura Soap and Ointment every day. In two months my hair commenced to grow, and in six months one would have known there had been any trouble, the hair coming out being black, the exact shade of my own. I have never had any trouble since, and feel I can't say half enough for Cuticura."

"Another member of our family was terribly poisoned by poison ivy and every summer for six years the blisters came, causing great suffering. We tried everything recommended by the best physicians, but with no good result. Finally we tried Cuticura which was permanent. She has never had any trouble since, so Cuticura is invaluable to you, see G. J. Browne, 1 Remington St., Dorchester, Mass., Jan. 26, 1910."

This letter is but one of hundreds giving proof of the success of the Cuticura in treating the skin and scalp. Folter Drug & Chem. Corp., Sole Props., Boston.

## SALT LAKE AND STATE NEWS EAGLES FLOCK TO SALT LAKE

SALT LAKE, Aug. 12.—With more than 100 delegates present from Utah, Idaho and Nevada, Grand State Deputy H. S. McCann of Salt Lake Aerie No. 67 called the tri-state aerie convention of the Fraternal Order of Eagles together at 12 o'clock today in the lodge rooms. After a few brief remarks in which he stated the purpose of the convention and organization to be a closer relationship between the members of the orders of the three states, Mr. McCann introduced the delegates to Salt Lake City.

In a short address, Geo. Spry welcomed the delegates to Salt Lake City. He declared that the tri-state organization was a good thing and that Utah would enjoy and be benefited by a closer relationship with the other states. He paid a compliment to the order by saying that its motto was of brotherly love, and that the promotion of such a feeling could only result in doing good.

"The good deeds of this order command the notice and respect of every person," said Geo. Spry. "We welcome here in Utah this feeling of brotherly love and closer relationship. Utah has been misunderstood by a great many, but we have nothing here to conceal. We throw our arms open to such men as you, who are here to form a closer relationship among the members of your fraternal order."

The Rev. William Thurston Brown welcomed the delegates in behalf of Salt Lake Aerie No. 67. He spoke at length on the great achievements of the order and what the order represents.

Mayor Bransford, who was also to speak, was unable to attend the convention on account of illness.

## TRADING LIVELY ON LOCAL 'CHANGE

SALT LAKE, Aug. 12.—There was a continuation of the era of good feeling on the local stock exchange this morning and prices held up strongly and in several instances they moved up. Trading was lively and had every appearance of being the beginning of a general revival of affairs. For some time stocks have been at a low level on account of the lack of interest by the public and conditions of trade. This has apparently passed and opened a new avenue through which the strong is moving toward considerable activity in stocks.

Colorado with its brightened prospect of getting ore at a lower level was up to 41 cents and closed strong at that price during the morning session. Cedar Tallies also came in for considerable activity, selling as high as 9 1/2 cents a share.

Columbus Consolidated was strong and Iron Blossom reached the 80 cent mark. Nevada Hills sold as high as \$2.41 1/2. Nearly every stock traded in showed more of an inclination on the part of the public to absorb some of the securities which are believed to be cheap at present prices. The total number of shares disposed of was 25,400, for which the brokers expended \$12,532.50.

On the curb market the only stock that sold was Opeka. The following sales were made this morning: 5,000 shares of Opeka at 45 1/2 cents and 500 shares at 46.

## RUSHING WORK ON COPPER LINE

Interesting Details of Bingham & Garfield Road Now Under Consideration.

Bingham, Aug. 12.—The new eighteen-mile Utah Copper railroad from Bingham to Garfield is being pushed vigorously, tents being pitched along the line sufficient to accommodate a small army. Over the whole distance some construction work has been done, except close to town, where tunnels are to be driven. A 300-foot tunnel, 160 feet high at its greatest altitude, will be constructed across Carr Fork, a little west of the center of town, to connect with the Utah Copper highline. From Carr Fork to Markham gulch a point near the Elmerston hotel will be an open cut. Work has been inaugurated here, one steam shovel being in operation now. Another bridge 200 feet long will span Markham gulch.

## Four Tunnels in All.

There will be four tunnels in all, one to be driven 1,400 feet from Markham to Freeman gulch; another, 2,100 feet, from Freeman to Verona gulch; and two more, of 700 and 800 feet each, from Smelter to Dead Horse gulch and from Dead Horse gulch to Dry Fork. The Nevada Construction company has the contract for the tunneling. Freeman gulch being the base of operations, 300 feet of tunnels having already been driven at various points. The grade on this road will not be a heavy one, averaging not more than 2.25 per cent for the entire distance, the route being comparatively direct. The distance to Garfield over the highline is at least twenty miles. The new line will cut off the distance seven or eight miles. The tunnels are to be 23 to 12 feet high by 18 feet wide, and will be timbered where the formation is soft. Those competent to judge, estimate that there are between 1,200 and 1,500 men employed at the various points along the line.

The most difficult problem to solve in the industrial operations of the camp is railroad transportation. This has been the case to quite an extent for several years past. The Denver & Rio Grande has done wonders in the way of transportation, but one line railroad cannot perform miracles in the face of a marvelous production. They have in the neighborhood of 3,000 cars, which they are running as systematically and expeditiously over a 2 per cent grade as the congested condition of traffic will allow, and yet

they are deluged with traffic. They have made maximum daily hauls of at least 23,000 tons of ore. No railroad could be expected to do more. The closing of the Yampa smelter means an additional tax upon the railroad. Hereafter the ore from the Yampa mine was taken to the smelter over the bucket tramway. Now they have an excellent contract to furnish the smelter at Garfield with 300 tons daily—ore suitable for fluxing purposes. At times the mine is compelled to close, not because they haven't the men to mine the ore at this end of the line, nor because the ore isn't needed at Garfield, but simply because they can't get the cars to take it there. This may occur many times before this extra tonnage is permanently provided for. A higher rate of speed would precipitate accidents and a loss of time entailed in the end. The closing of the Utah Copper mill at Coperton, when a little town of 300 people was wiped out of existence, in any way affected the railroad tonnage. The 1,000 tons of ore daily, which had heretofore been diverted to Coperton, now follows the main channel to Garfield.

## Great Growth in Tonnage.

This mill was simply an initial plant that had outlived its usefulness. Its status was that of a man using a stickie when there was a big binder in the field. It was absorbed in the onward march of bigger things. Why was it that the output of the Utah Copper for the month of May exceeded other months? Simply because the train service was the best—a fortunate month with a minimum of accidents. It could easily have been 10,000,000 pounds of copper as far as operations at the mine are concerned.

The advent of the new Utah Copper railroad here and to Garfield will be hailed with gratification by all who are interested in the camp, and by none more than the Denver and Rio Grande system. No one for one moment would claim that this new road can handle the tremendous output of the Utah Copper property. The Denver & Rio Grande will continue to handle a large percentage of it, but will be relieved of congestion to such an extent as to give excellent service to lesser proportions that are coming into the line. Both roads will have all the business they can handle.

The amount of freight handled here in covered cars is enormous. The charges for received freight alone amount to more than a million dollars per year. It has been well said that the receipts of this little Bingham branch pay the operating expenses of the entire system. Curtailment in the production of copper may be necessary just now, and may be actually in effect, but whether it is or not, it can only be for a limited time and does not affect the general situation. The mineral resources of Bingham have barely been scratched over as yet, and provision should be made for the tonnage of the future.

## SERIOUSLY HURT IN STREET CAR ACCIDENT

Salt Lake, Aug. 13.—Stepping in front of an eastbound O. S. L. depot car, No. 429, on the corner of First and Second South streets, a man who is believed to be J. R. Parks of St. John, Kan., was struck by the car and seriously injured Friday night. He was carried into a nearby drug store and later removed to the emergency hospital. Police Surgeon H. B. Sprague made an examination of the man's injuries and ordered his removal to the Groves L. D. S. hospital, where he was reported as resting easily this morning.

Parks was walking south on First West street, and the car, in charge of Conductor C. W. Prosser and Motorman A. B. Brown, was moving eastward on Second South street. Motorman Brown saw Parks approaching the track, and after sounding the gong applied the brakes. Parks stepped close to the car and then stopped, just as the car started on ward Parks, for some unknown reason, stepped in front of it and was thrown to the ground. He received severe bruises about the face and head and is believed to be suffering from internal injuries.

Those in attendance at the hospital attempted to get the name of the man, but were unsuccessful, owing to the patient's condition.

## SAYS WIFE ABHORRED SIGHT OF BATH TUB

Salt Lake, Aug. 13.—Judging from the evidence introduced at the hearing of the divorce case of Albert Bellman against Esther Bellman in District Judge Armstrong's court on Friday, Bellman should have been satisfied that his wife did desert him. He testified that she was uncleanly in her habits, and that she did not take a bath for six months at a time. Bellman was given a divorce on the ground of desertion.

Divorces were also granted by Judge Armstrong in the following cases: Louise Dummer against Alexander Dummer, on the ground of cruelty. Albert Phelps against Everett L. Phelps, non-support.

Ethel Thatcher against Albert J. Thatcher, non-support.

In the case of Le Roy Wagstaff against Margaret Wagstaff, plaintiff was ordered to pay his wife \$20 per month temporary alimony.

Marley P. McIntyre was ordered to pay his wife, Ore M. McIntyre, \$50 as attorney's fees and \$25 as suit money, so as to enable her to make a defense to his action for divorce.

The court ordered Geo. W. Smith to pay Elmer Smith, who is suing her

husband for divorce, \$25 as attorney's fees and \$15 a month temporary alimony.

In the case of Addie M. Walker against George M. Walker, the defendant was ordered to pay his wife \$30 per month temporary alimony and \$50 as attorney's fees.

## COMPLETE FIGURES FOR SCHOOL CENSUS

Returns Show Increase in City of 1665 Children of School Age.

Salt Lake, Aug. 13.—Clerk L. P. Judd of the city board of education on Friday received complete returns on the school census for the year, which shows the total school population of the city to be 22,632, which is an increase over last year of 1665 children of school age.

Every precinct in the city showed an increase, excepting the Second, which showed a loss of 93, as compared with last year. Districts 25 and 26, from which returns had not been received until Friday, showed a loss as compared to last year. District 25 showed a loss of 134, and 26 showed a loss of 83.

Following is the census by municipal wards and the gain or loss as compared with last year: First, 7, 650; Second, 1,445; Third, 5,697; loss, 90; Fourth, 1,052; gain, 107; Fifth, 3,079; gain 37; Sixth, 2,265; gain 165.

## BETTER LEAD PRICES ARE CONSIDERED CERTAIN

Salt Lake, Aug. 13.—A canvass among the mining and smelting circles of the city in search of opinions regarding the lead situation disclosed a practically unanimous belief that lead prices are due to rise, but there is nothing now in the situation of a sufficient tangible form to permit any definite idea as to when the upward movement would begin. One smelting engineer said yesterday:

"There is a scarcity of lead ores, and there are no new lead camps being opened up. The production is very unsatisfactory, yet at the same time there is such a reduced consumption that prices for the metal do not have a chance to harden. In explaining the unsatisfactory conditions now existing with the National Lead company, President L. A. Cole laid special emphasis on the diminished trade and the increased price of linseed oil, and this company, which stands to the lead smelters as the smelters stand to the lead mine owners, has had to reduce its dividends."

"Hard times strikes right and left, without regard to feelings. During the present slowing-up period the property owner is not painting his house, nor is he mowing his lawn. It needs it. Money is tight, so the homes must go without a fresh coat of paint until next year. Reduced building operations mean a reduced demand for plumbing supplies, of which lead provides the important item. These are only two points in a situation which is intertwined with conditions of unfavorable import. The only question is not will prices improve, it would be ridiculous to doubt this; but when will they improve?"

## COL. COOKE WAS INSANE ON MINING

Seattle, Wash., Aug. 13.—The defense for Colonel George F. Cooke, on trial before a court-martial at Fort Lawton on charges of financial irregularities, while in command of Fort Gibbon, Alaska, finished the taking of testimony yesterday. Arguments of counsel will be heard Monday.

Captain W. H. Bergman of the government boat Jeff Davis, testified that the accused officer was insane on the subject of mining and proved an easy victim for promoters.

Captain Mack Cunningham of the Signal Corps, a member of the former board of inquiry, which met at Fort Gibbon, where Colonel Cooke was commanding when the irregularities are asserted to have occurred, testified that Colonel Cooke had denied to the board that he had ever been warned about the reputation of Private William Lane, whose disappearance preceded the discovery of a shortage of \$10,000 from the paymaster's funds.

## SMOOT FAMILY PARTY AT PROVO TODAY

Provo, Aug. 12.—The Smoot family will hold a reunion at the Geneva resort tomorrow.

It is expected that there will be an attendance of one hundred and twenty-five to one hundred of fifty persons, most of whom will be from Provo, with a number from Salt Lake and other parts of the state.

The young people will leave Provo on hayracks at 8 o'clock and these will be followed by the older members of the family in automobiles and carriages.

The day will be spent in enjoying the sports and amusements of the resort and an impromptu of speeches, songs and readings will be rendered. The Mozart orchestra will be in attendance. Among the prominent members of the family expected to be present are Senator Reed Smoot and Apostle O. F. Whitney.

## A DIFFERENCE ON WATER.

American Fork, Aug. 12.—A mass meeting was held here last night of all the water users of this city, to consider the feasibility of making a change of waters with the Provo River Reservoir company. What the reservoir company wants is to bring the

waters from Provo river through their canal, to a point just north of town, and divert it into the ditches of this district; then they will take the American Fork water out near the mouth of the American Fork canyon and divert it along the low hill to the north of town, and bring a large acreage of what is now bare land, under the ditch. The people here do not take to it kindly, as the meeting adjourned without coming to any decision in the matter.

## EAGLES' TRI-STATE CONVENTION HELD

Salt Lake, Aug. 13.—With over 100 enthusiastic delegates, representing 16 different aeries of the Fraternal Order of Eagles, present yesterday afternoon, the tri-state convention for Utah, Idaho and Nevada was affected, officers elected, permanent organization adopted and Idaho Falls named as the next meeting place, one year hence. A team drill was held in the evening between the Salt Lake and Ogden aeries, and supper was served.

The first session of delegates was called at noon, Deputy Grand President H. S. McCann in the chair. After Mr. McCann had welcomed the delegates in behalf of the order, Governor or William Spry delivered a welcome speech in behalf of the state, and was followed by William Thurston Brown, who dwelt with eloquence on the principles of the order, dealing separately and collectively on liberty, truth, justice and equality. C. A. Boyd responded for the visiting delegates. Mayor Bransford was unable to attend, owing to illness, but sent a letter of welcome.

After the short opening session the delegates adjourned until 2:30 in the afternoon, when they got down to business. The report of the committee on organization and order of business was adopted and the following temporary officers chosen: President, H. S. McCann; vice president, H. E. Walker; treasurer, A. G. Miller; chaplain, Jake Thomas; conductor, H. Gustaf; inside guard, Alf Christensen; outside guard, William Cunniff; committee on organization, the committee on the competing teams select the judges for the exemplification of ritual exercises, and that the constitution, adopted by this convention, be submitted to the subordinate aeries of this district for their approval as a whole, and shall go into effect as soon as possible.

## Officers Elected.

At the regular election of permanent officers C. A. Boyd of Pocatello was chosen president; William Thurston Brown of Salt Lake, vice president; M. M. Beaver of Salt Lake, secretary; F. A. Rogers of Ely, Nev., treasurer; Earl Geiger of Ogden, chaplain; E. Gustaf, Eureka, conductor; J. Cook, inside guard; H. E. Phelps, Midvale, outside guard; C. A. G. Miller, Boise; A. W. Froman, Bingham, and B. F. Jones, Carlin, trustees.

On the committee on organization and permanent order of business are Earley P. Christensen, Salt Lake; M. Davidson, Ogden; Jake Thomas, Pocatello; A. G. Miller, Boise, and M. J. Murray, Eureka. The credentials committee is composed of Andrew Mutchler, Pocatello; M. M. Beaver, Salt Lake; B. F. Jones, Carlin, Nev., and F. A. Rogers, Ely.

## Ritual Contest.

The Salt Lake aerie No. 67 drill team won the contest over Ogden No. 118, taking the \$70 first prize. Ogden won the second prize of \$30. These two teams were the only ones to compete. J. T. Dean of Bingham, F. A. Rogers of Ely and H. Gustaf of Eureka are the judges.

## DAVIS TOMATO CANNERIES BEGIN SEASON'S WORK.

Kaysville, Aug. 12.—The tomato canneries throughout Davis county will commence operations for this season today and the prospects for a bumper crop of the product this year are bright. The fact that the crop of tomatoes in Davis county is ripening about two weeks ahead of the usual time is looked upon by the growers and packers as an indication of a phenomenal yield per acre. Usually the crop is affected by the early fall frosts in ripening. This year it is eliminated, as the fruit will all be gathered before the nights become cold enough to do any damage. From the start of the canning there will be three weeks of ripening weather. The crop is in excellent condition. The canneries are paying the farmers \$10 per ton for the tomatoes, \$2 per ton more than formerly.

## MINERS' UNION ELECTION.

Park City, Aug. 12.—At a special meeting of the local Miners' union last night, Pat McEvoy was elected to succeed Jerry Shea as financial secretary of the union, and Theodore Nelumth was elected a trustee to succeed the late Bartley McDonough. Mr. Shea, at the recent convention of miners in Denver, was made a member of the executive board of the national organization, and will have as territory the mining districts of Utah, Colorado and New Mexico. The meeting was the largest attended union meeting held in this city since 1907, when unionism locally was at its height.

## IOWANS LIK EGUNNISON VALLEY

Ephraim, Aug. 12.—Messrs. Fremont Barnes and W. B. Hart of Underwood, Ia., are in the Gunnison valley to look up the real estate in that section. Mr. Barnes already owns a tract of the Parker farm, which he intends to occupy next January. Both of these gentlemen are highly pleased with the appearance of the Gunnison valley.

## RAY AND CHINO ORDER VANNERS

Salt Lake, Aug. 13.—The largest order ever negotiated for vanners has been successfully completed by the Gallagher Machinery company of Salt Lake City from the Ray Consolidated and Chino Copper companies of Arizona. It was learned on Thursday that over 1,500 Isbell vanners had been contracted for, the consideration for the machines being somewhere in the neighborhood of a quarter of a

## FREE TO YOU—MY SISTER

With to continue, it will cost you only about 10 cents a week or less than two cents a day. It will not interfere with your work or occupation. Just send me your name and address, tell me how you suffer, if you wish, and I will send you the treatment for yourself, entirely free in plain wrapper, by return mail. I will also send you free of cost, my book, "WOMAN'S OWN MEDICAL ADVICE," with explanatory illustrations showing why women suffer, and how they can easily cure themselves. "You must have an operation," you can decide for yourself. Then when the doctor says, "You must have an operation," it cures all old or young. To Mothers of Daughters, I will explain simple home treatment which speedily and effectively cures Leucorrhoea, Green Discharge, Painful or Irregular Menstruation in young Ladies, Pimples and all skin troubles, and always results from the use.

Wherever you live, I can refer you to ladies of your own locality who know and will gladly tell any sufferer that this Home Treatment really cures all women's diseases, and makes women well, strong, plump and robust. Just send me your address, and the free ten day's treatment is yours, at the book. Write today, as you may not see this offer again. Address: MRS. M. SUMMERS, Box 8, Notre Dame, Ind., U.S.A.

chine firmly to the required grade. The use of the long side steel leaf springs for carrying the shaking frame is unique in vanner construction, and is a device for this purpose impossible to improve upon. It combines great strength and positiveness with the necessary side flexibility and refined leveling adjustments. At any given speed or stroke the motion is without the slightest jar or vibration and is truly horizontal, enabling the heaviest loads to be carried without any slopping over, and "sandy or sloppy corners" are an impossibility. There are no struts, pins and eye bolts to wear out or to get out of place. In addition to supporting the shaking frame they also serve, independent of the external bracing of the shaking frame, to maintain it perfectly square and in alignment, no matter how uneven the tension on one side of the belt may be. For adjustment a simple set screw on each nut at each back end adjusts the rear roller into perfect accord with the front one. These leaf springs are made of common untempered quarter-inch boiler plate, and after continuous service of over 12 months with the first machine ever built they show even under the most severe conditions as to length of stroke and speed, no signs of weakness or crystallization whatever.

The Isbell pulp distributor consists of two decks. The upper one is similar to the regular Frue vanner distributor and slopes toward the head roller; the lower one is immediately underneath and slopes the reverse way. This lower deck is composed of 16 wood slats 3.34 inches wide by 20 inches long, spaced one-quarter of an inch apart and forced 17 slots, through which the pulp falls. The underneath side of the deck so formed is roughed with sawtooth grooves over its entire surface, so that the pulp is distributed in innumerable drops over the entire area of 12x72 inches. The pulp is deposited on the belt without causing the slightest disturbance of the pulp surface.

The inclination is changed by tipping the whole machine with the transverse shaft as the center of the movement. A short cast iron stand set close to the head and clamped to the projecting arms hold the machine firmly.

**\$55 to Chicago and Return**
